

August 4, 2009

There are changes coming to the corner of Main and Mercer Street in Princeton, WV! As the site of the former Princeton Community Hospital Emergency Room, 1330 Mercer Street has remained relatively unchanged since the early 80's. Now, as Murphy continues to grow, it is time to update the building and beautify a prominent corner in Downtown Princeton.

There are several renovations planned, but the most visible will be:

- New low-e, high performance sliding windows
- Canvas awnings on the Mercer Street façade
- Relocated and painted signage
- New stucco crown molding below the parapet along the Main and Mercer Street facades
- Slate tile covering the front porch
- Tearing out the overgrown ground coverage on Main Street and around the building and replacing with professionally designed landscaping
- Painting the columns and doors to match the new windows

Murphy is currently accepting bids from all trades. If your company is interested in quoting any of the above work, please send us an email or call for a scope of work.
